Metal-Free Crown and Bridges

It wasn't long ago that metal based crowns and bridges were the norm in dentistry, and a standard accepted in a world without choice.

Now however, we enjoy the esthetics and dependability of super-strong, medical quality ceramics, such as Cercon Zirconia for our modern dental restorations. Cercon Zirconia provides natural luminescent qualities and allows light and color to come through like no metal based crown and bridge ever could. Advanced CAD/CAM technology ensures that you receive a great fitting restoration every time.

Trust Cercon for:

- *Dazzling esthetics*
- *Super strength*
- *Precise and accurate fit*
- *Outstanding durability*

If you and your dentist feel that a crown or bridge is right for you, remember to ask for Cercon Zirconia. With over 2 million restorations placed, It's your best choice for metal-free CAD/CAM esthetics.

CERCON® has proven to withstand the test of time
which is why it is covered by one of the
longest guarantees against breakage.

Ask your dentist for more information about
CERCON® Zirconia, the metal-free crown and bridge
restorative system.

Tissue recession over time:

Metal based restorations will show
the metal as the gum recedes.

Cercon metal-free restorations
maintain their esthetics over time.
